CORE SKILLS

Programming Languages

- JavaScript, Java, Python, TypeScript

Frontend Development

- React.js, Next.js, HTML5, CSS3, Tailwind CSS
- API Consumption

Backend Development

- Node.js, Express.js
- Rest API development and integration

Databases

- MySQL, MongoDB

Tools & Technologies

- Git, GitHub
- Jira, Postman

Concepts

- Responsive Design
- Component-based Architecture
- State Management (Redux, TanStack Query)
- CRUD Operations
- Basic Testing & Debugging

PROFILE

Driven and motivated Software Engineering undergraduate with a strong foundation in full-stack web development. Proficient in building responsive and scalable web applications using React, Next.js and Node.js, with hands-on experience in API integration and full-stack development. Experienced in developing real-world projects including client-based systems and web platforms. Passionate about solving real-world problems through technology and continuously expanding knowledge in software engineering and modern development practices. Seeking opportunities to contribute to impactful projects while further developing technical and professional skills.

EDUCATION

BSc(Hons) in Computer Science

University of Westminster affiliated with IIT

2024 - PRESENT

- Software Development I
- Object Oriented Programming
- Mathematics for Computing
- Database Systems
- Trends in Computer Science
- Server-Side Web Development
- Computer System Fundamentals
- Algorithms: Theory, Design and Implementation
- Software Development II. Web Implementation
- Design and Development

Informatics Institute of Technology

2023 - 2024

- Foundation Certificate in Higher Education

S. Thomas' College - Mount Lavinia

2014 - 2023

School Education

- GCE A/L - 2022(2023)

Highlands College – Maharagama

School Education

- GCE O/L - 2019
-

PROJECTS

CorpoVinculo

[corpovinculo.com](#)

Worked as the Frontend Lead in developing a multi-tenant event and sponsorship management platform.

- Designed and developed responsive and scalable user interfaces using Next.js and React
- Collaborated with the backend team to integrate REST APIs and ensure smooth data flow
- Implemented state management using Redux and TanStack Query
- Focused on delivering an intuitive and user-friendly experience across dashboards
- Contributed to team coordination and frontend architecture decisions

Key Areas: Frontend Development, React, Next.js, API integration, State Management, System Design

SOFT SKILLS

Problem Solving & Critical Thinking

Ability to analyze and breakdown technical challenges and develop efficient solutions.

Collaboration & Teamwork

Experienced in working with cross functional teams and knowledge sharing.

Communication

written and verbal communication skills.

Leadership & Project Management

Led multiple projects, overseeing development, deployment and team coordination.

Adaptability & Continuous Learning

Quick to learn and apply new technologies, frameworks, and methodologies.

Time Management & Productivity

Ability to efficiently prioritise tasks, manage deadlines and balance multiple projects

Creativity & Innovation

Brings creative problem-solving and innovative thinking to projects.

LANGUAGES

English

Sinhala

Japanese (beginner level)

Online Food Ordering System (Ongoing)

- Developed a full-stack web application for a restaurant using Next.js
- Implemented user authentication to manage customer accounts securely
- Integrated a payment gateway to enable seamless online transactions
- Designed an intuitive interface for browsing ads and placing orders

Key Areas: Full-Stack Development, Next.js, Authentication, Payment Integration, UI/UX

Restaurant Inventory Management System

<https://ccp-inventory-tracker.vercel.app>

- Developed a full-stack web application to streamline restaurant inventory tracking and stock management
- Built a responsive frontend using React.js with reusable UI components and modern state management using Hooks
- Designed and implemented a lightweight backend using Node.js and Express.js with RESTful APIs for inventory retrieval and updates
- Integrated file-based JSON data persistence for storing stock records, quantities, pricing, vendors, and storage locations
- Added core CRUD-style functionality for adding items, editing stock details, and saving inventory snapshots by date
- Deployed the frontend on Vercel and backend on Render, enabling live cloud-based access and testing

Key Areas: Full-Stack Development, React.js, Node.js, Express.js, REST APIs, CRUD Operations, JSON Data Storage, Cloud Deployment

CERTIFICATIONS

- Java Essential Training – LinkedIn Learning
- Learning TypeScript – LinkedIn Learning
- React Essential Training – LinkedIn Learning
- Agile Workshop – Leo Club IIT
- Python for Beginners – University of Moratuwa
- Web Design for Beginners – University of Moratuwa
